## FA

## Fixed Asset

Import Fixed Asset, History, Cost and Depreciate for each asset direct ling to General Ledger

- Support All Kind of asset such as Land , Buildings , Vehicle , Equipment or Licensed
- Assign Automatic Code Generate By Separate Type of Asset up to 30 Characters
- Custom Category of Asset with link to separate General Ledger freely
- Support Group of Items such as Set of Equipments 20 pieces - Separate draw
- Print Asset Label with Barcode Support RFID for control movable asset
- Able to record Cost of Asset with Custom Detail list such as Cost of Purchase (Support Foreign) Installation and Big Maintain
- Support Calculate depreciate with 4 function as straight, Quantity of Production Decrease year and Multiple Decrease year
- Update / Add more cost such as high cost spare part and more
- Able to change calculate Function for more support for join venture or merging business
- Able to make Sub asset or parent asset (Part Tools Asset)
- Realtime Display depreciate by monthly and yearly
- Add Picture, Insurance, Vender , Factory and more detail of profile for each asset
- Support Project, Division, Department, Section to separate cost and General Ledger
- Support Change Division Between Period. with share depreciate by division
- Support Asset on built
- Able to Filter to Process depreciate by Project, Division, Department, Section on Manual one by one
- Able to filter asset for service department
- Realtime Link record to General Ledger
- Calculate @day sale for depreciate, profit and loss
- Support for unuse asset , loss and more
- Link with Purchasing System and Account

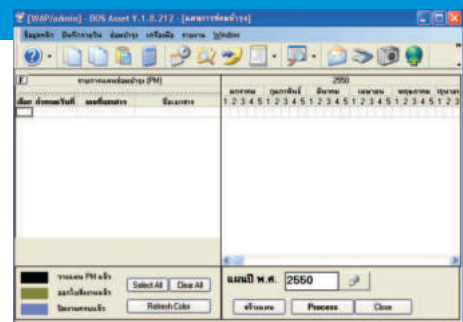

## MM

## Maintenance Management

Easy to maintain your asset and control cost for maintenance

- Support Machine Schedule and setup more detail of machine installation
- Plan for Fuel, Factory Supply manage by asset or for all support to purchase and planning department
- Preventive planning for maintenance for each asset
- Able to create Fixed Request and Checking Note and Reports
- Link to Purchasing System to make order of spare part

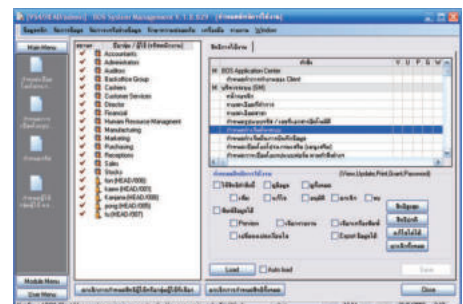

## SM

## System Management

High Level Security Control with Group and User for All Command and Report

- Assign Permission to all Command and Report deep in detail such as add, edit, check, approve and so on
- Easy to control Visible to himself or Group work
- Assign permission to access any branch or all branch
- Some Command Deep Command Permission such as Costing and Salary
- Support Terminal Remote Access via ADSL or Leases line with only less 5% dropping speed depend on Server Hardware.

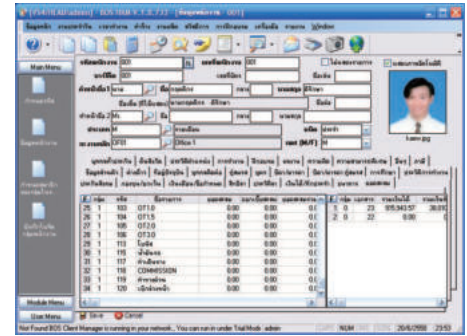

HR

## Human Resource

Full Fill Function to manage human system

- Support to 4 Level of Organization From Branch Division Department and Section
- Unlimited for Branch Division Department and Section
- Support many type of Employee as Monthly Daily Weekly Hour piece of work and contact
- Insert picture and all of detail Partner Child Parent Foreign and so on
- Support to record Training Cost of training able to make multi human as one document
- Able to record Specialists Education
- Able to preset Income and expense for each employee
- Allocation wage to job cost sheet
- Print Employee card with Barcode support all printer
- Leave Record, OT, Switch Time direct from Section and Approve by Human Department or Authorize Controller
- Support to record Leave Record, OT, Switch Time able to make multi human as one document
- Able to Create Balance separate by income and expense for each employee

TA

## Time Attendance

Support All Card Leader, Finger Scan No need period button (Support Door Lock Scan)

- Able to work with any model any brand (No need period in out button)
- Support multi company share with equipment at same time
- Easy to check report of Leave, late by employee or by group of employee
- Able to create Leave, OT, Switch Time before and after time (any time only before time process)
- Unlimited Period Setup Support OT for Holiday and Morning OT up to 4 type of payment function
- Automatic calculate Active Bonus and Tip
- Easy to declare active function such as Last 15 minutes cut 1 Hour and so on

PA

## Payroll

The best payroll system 100% Guarantee with Full function support export file to diskette and upload

- Easy and Unlimited to create New type of Employee with 7 patterns
- Unlimited assign and setup income and expense with many optional can design to match your function need
- Support type of decimal, calculate tax, social security to any income and expense
- Step adjust of decimal such as time
- Multi type of Salary Calculate Method such as Monthly Daily Weekly 15 Days 10 Days Hour Piece Cover By Cash or Transfer
- Built-In PIT.91, WHT.50, PIT.1, PIT.1A, SSO.1-10, 1-03, 6-7, 6-8, 6-9, Government Employee List and more
- Provident Fund Pay slip and many outside contact can print direct from program
- Generate file for Bank, SSO, Revenue and Fund to diskette or to use upload
- Separate Process Salary Period by Employee Type Able to Edit or Reprocess after check
- Support Multi Period Per Month (Merge All Holding money together and Recalculate it)
- Able to Add and Customer All Report include all language (depend on fonts and windows installed)
- Link data from Production System and Account System

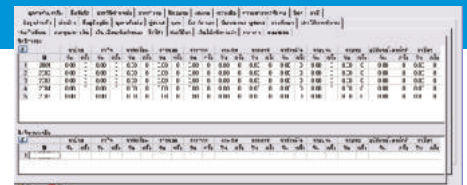

WF

## Welfare

Safe your time and make it easy to multi level of leave, time function by automatic calculate

- Preset permission to leave by work year or direct to each person
- Support Active Tip, Active Amass Bonus, able to many fix, percent or step up bonus
- Realtime checking available Leave permission
- Support to amass cross year
- Check back welfare for long time back depend on hardware of your policy

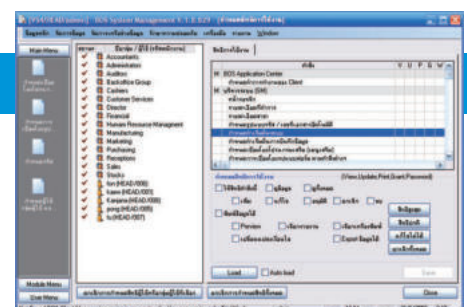

SM

## System Management

High Level Security Control with Group and User for All Command and Report

- Assign Permission to all Command and Report deep in detail such as add, edit, check, approve and so on
- Easy to control Visible to himself or Group work
- Assign permission to access any branch or all branch
- Some Command Deep Command Permission such as Costing and Salary
- Support Terminal Remote Access via ADSL or Leases line only less 5% dropping speed depend on Hardware.

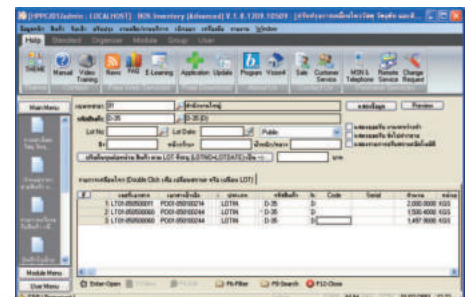

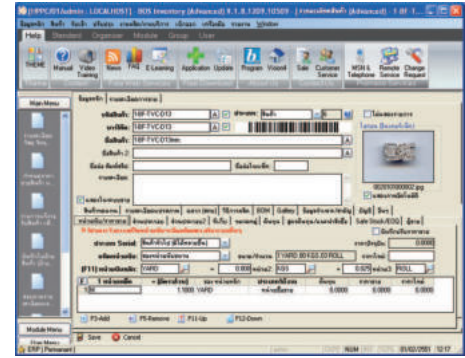

## IC

## Inventory Control

Inventory will not hard work any more with full function of billing link direct to General Ledger)

- Support Multi unit can be make it auto for stock unit, purchase unit and sale unit
- Automatic calculate function of unit factor
- Support Barcode Unit filter by department
- Unlimited Structure and category up to 3 level deep ( Line Section Group) and 4 Dimensions per each Level
- Support (Drawing) for production department able to receive Product Sample
- Design your Label with Data support for Update New Law
- Pre part List , with Multi item creator tools
- Static Pack of Software Pack Tools use for Calculate and control your stock
- Assign Unlimited Level of BOM and Formula freely and unlimited design pattern
- Control Safe Stock, Lead time, Re order point, EOQ and History of Order
- Easy to manage and control warehouse, location support summary by separate or together
- Support Stock of Consign, Receive Consign, Factory Lot, Lot, Lot Date, Color, Shape, Size, Grade, Job Code, Cost Reserve Stock and Scrap
- Quick Search and Filter Tools support Summary multi level of filter
- Support Stock of Product such as WIP Internal Process send for outside production can summary together
- Support Stock of Scrap and manage it by system location
- Complete tools for control stock movement and available
- Support JOB Order with Cost sheet and Separate by Project
- Assign Structure of BOM with unlimited Level
- Built-In support Barcode, RFID
- Support Draw Material by separate project
- Useful tools to detect supply chain filter by Purchase Order, Sale Order, Job Order and Project
- Support Barcode ,Serial No for all Solution And able to scan Serial without rescan item barcode
- Graphics tools for detect hardware.
- Unlimited item with many features and detail support (Now have Customer created up to 350,000 item and grow up every month)
- Enable design auto item code format up to 30 character separate by type of item
- Unlimited Warehouse and Location (Location can be design to multi level deep on code)
- Automatic highlight and alert for reorder point is available
- Report movement m un movement, aging and more
- Report Top Sale by item or Group of item
- Cost Adjust tools support lot adjust and focus on time
- Able to edit or adjust main item detail by multiple item
- Able to adjust inventory by Quantity or Cost
- Able to working continue after begin balance or work it with out begin balance of all
- Support all kind of item such as material, semi goods, goods, service, set of goods, supply , stationery and WIP
- Cost and be keep for multi time adjust (history)
- Able to use barcode, support for hand help every form
- Able to use Weight Machine every form
- Built-In many Necessary reports and Analysis Reports

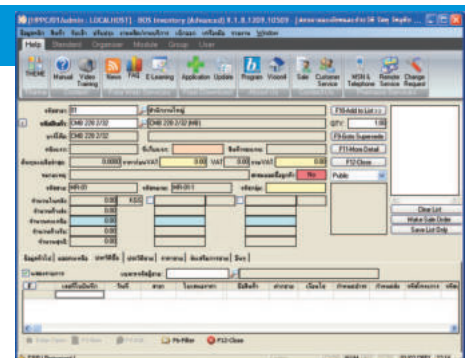

## AI

## Advanced Inventory

Some products need more special detail change on time of transactions or need change any times

- Multi parallel unit (1 Unit with 2 parallel (such as YARD-K.Gs-ROLL, GRMS-EA)
- Support up to 5 Custom Parameters such as Size Serial No Frame No, Engine No ๙
- Direct Link to any module such as Accounting, Purchasing, Sale Order, Production and more
- Able to use Parameters to filter report

WH

## Warehouse Management

Warehouse control will help you to match your stock to available warehouse space  
safe your products from broken of expired and easy to picking, clean and more

- Unlimited Warehouse and Location
- Able to checing and searhing item by location , checking and get balance form each location
- Display tree view of structure of your design
- Able to set limit of Location Aging of product in location (help production to control time of WIP)
- will display in graphics more\*

PR

## Purchase Requisition

Powerful to control cost of purchase and planning time in of material match will time  
to use and storage limited

- Purchase Requisition link from any module such as Production, Stock and more
- Support All type of Requisition can be blank for item
- Able to Separate type of Requisition and set it separate document no.
- Report can be analysis time and period for trace back to original
- Support to separate branch , Import data and freight fee

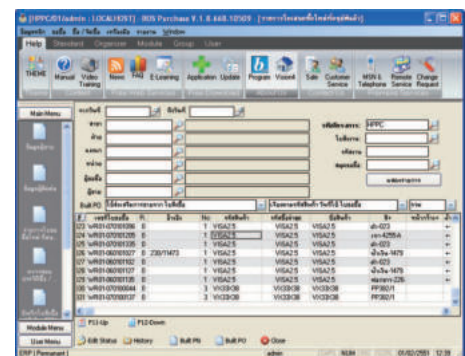

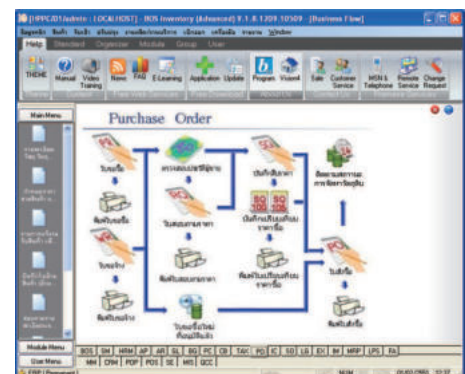

PO

## Purchase Requisition

Powerful to control cost of purchase decreases miss and trace for material  
match to time of use from production

- Assign Vender Code Link direct to Account Payable
- Able to preset bank account to make transfer of payment
- Easy to search for Supplier By Name , By Product and more
- Easy to search purchase history or last price
- Trace back Purchase Order, Purchase Requisition was come from each production order, sale order and any source
- Easy to direct make Purchase Order with out Requisition
- Use PA to make decision compare price for high price item
- Able to Order material of product without exist code in database
- Support consign purchase order
- Support Multi level of discount
- able to show picture on PO PR correct more detail of requisition
- Realtime input to seek Purchase history on Grid by press F9 key
- Able to separate due date request date by item and able for partial delivery
- Highlight status of Purchase Order and Requisition
- Report Purchase Order and Requisition Status
- Summary Report of Purchase Order able to filter by Supplier
- Compare and Analysis for price of Purchase make it to plan for use in next year
- Report Top of purchase with vender promotion
- Analysis of Purchase Report, Vender Analysis , Delivery Quality of item and more

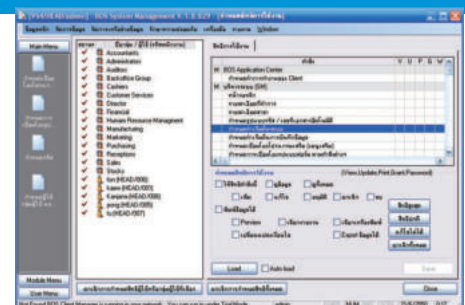

SM

## System Management

High Level Security Control with Group and User for All Command and Report

- Assign Permission to all Command and Report deep in detail such as add, edit, check, approve and so on
- Easy to control Visible to himself or Group work
- Assign permission to access any branch or all branch
- Some Command Deep Command Permission such as Costing and Salary
- Support Terminal Remote Access via ADSL or Leases line with only less 5% dropping speed depend on Server Hardware.

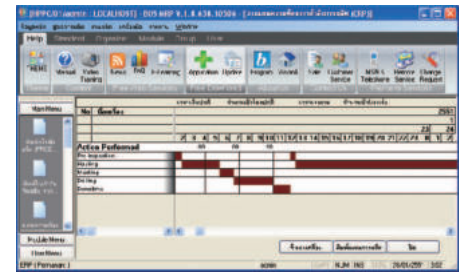

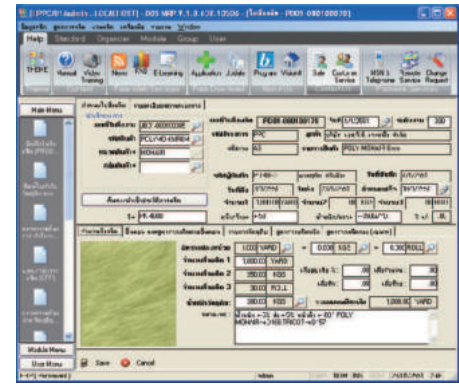

## MRP

## Manufacturing Resource Planning

Let your production just in time good quality and more productivity

- Direct Link to Sale Order System, Purchase Order and Inventory System
- Support Line Process and Job Order
- Create Machine on Fixed Asset System link to production system with full parameter setup support
- Able to create production Process and BOM with unlimited level and sub bom
- Design Unlimited Production Formula Process and method
- Easy to change plan with real time link to Sale Order System
- Assign planning by Group of item (un fixed order in group) decrease time to plan
- Estimate leadtime from planning
- Support difference unit for each process able to switch and convert together
- Control or trace status of Shop floor control by each station unit
- Support Product Order, Sample Order and R&D Production Order
- Repair Job Order and Urgent Request Order
- Support for Capacity Requisition Planning (CRP)
- Support QC System on process separate by station
- Record and Report scrap for each station
- Automatic generate MRP (Material Requisition Planning)
- Control Costing Account (DM, DL, OH) Link it direct to Inventory system and Human Resource System
- Check and trace Master distribution system (MDS) at realtime
- Realtime checking for finish goods, work in process and scrap
- Trace production by job or item include all of detail available

## SFC

## Shop Floor Control

Link direct to from in line make it real data cost for machine, labor, material, for each job  
Real time status support estimate available for just in time control

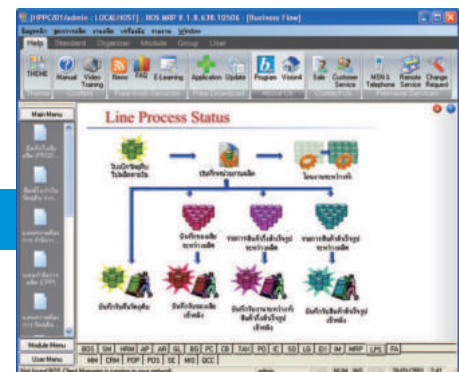

- Create Scrap type separate from node of production unit
- Able to use more type of material per station
- Able to use more time of material per station
- Able Unit separate by station can switch it by real time work can be available job

## R&amp;D

## Research &amp; Development

Un plan process Job Order can be create easy and change at on time of order

- Support R&D Production Order can test from blank or copy same process of other product history

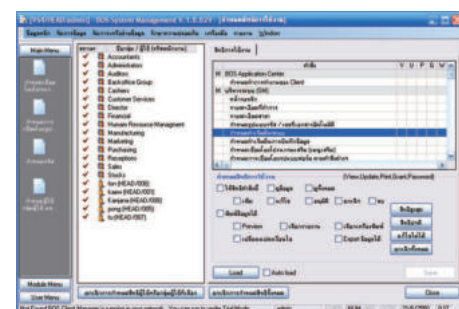

## SM

## System Management

High Level Security Control with Group and User for All Command and Report

- Assign Permission to all Command and Report deep in detail such as add, edit, check, approve and so on  
Easy to control Visible to himself or Group work
- Assign permission to access any branch or all branch
- Some Command Deep Command Permission such as Costing and Salary
- Support Terminal Remote Access via ADSL or Leases line with only less 5% dropping speed depend on Server Hardware.

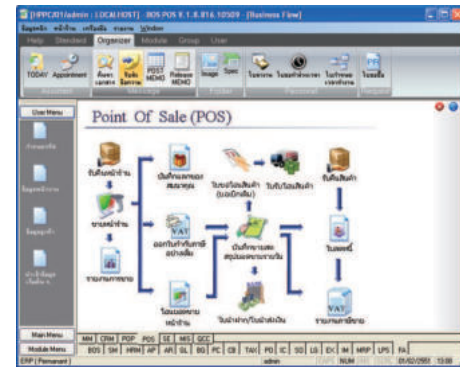

## POS

## Point of Sale

With Complete and cover Function and more permission control improve your Point of Sales , Report and Analysis to easy time

- Multi Screen (Multi Document interface)
- Support Customer Information Screen (such as 7-Eleven)
- Multi Level of discount
- able to lock item price date time and more
- Separate product count sale mile by item set
- Support all equipment such as barcode reader, cash draw, Led, Slip Printer, Barcode Printer and more
- Able to work On-Line and Off-Line
- Easy to make Sale Return on Order Form, and easy to make tax invoice
- Able summary by day to day or multiple day
- Link direct to Accounting system
- Support EAN13 Barcode ,Private barcode or mixed
- Support for Serial No Barcode
- Built-InSale Reports, Summary Reports , Top Sales , profit and more

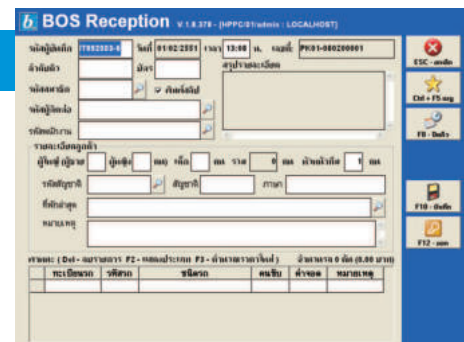

## RE

## Reception

Register Customer Visit will help to use by Analysis Report of Customer support Tour Reservation and more

- Open Queue of Customer to check Summary of order by group
- Able to record and pay for Drivers tour leader Vender and more
- Built-in Visit Report and payment Report
- Direct Link to financial System

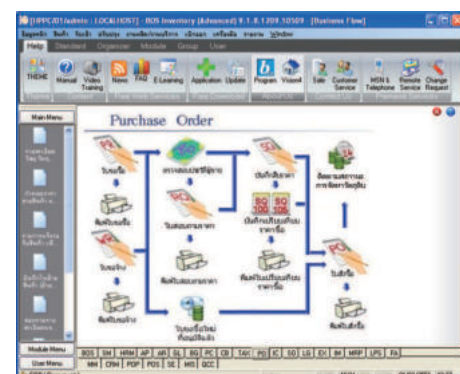

## PO

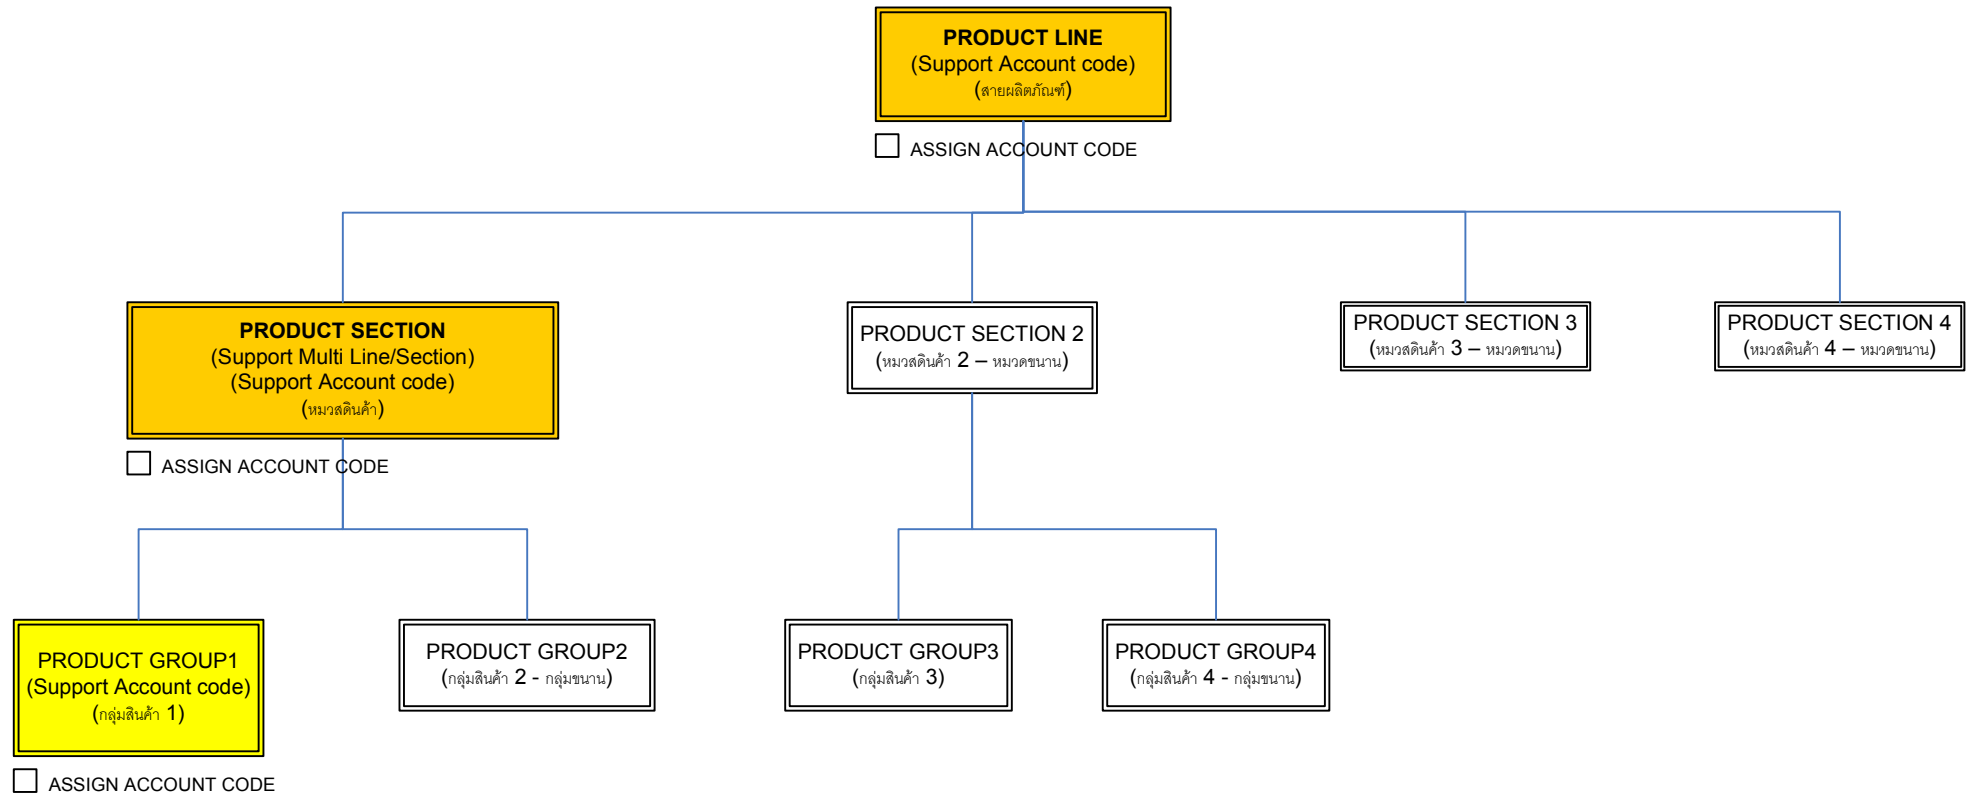

## Purchase Order

Powerful to control cost of purchase decreases miss and trace for material match to time of use from production

- Assign Vender Code Link direct to Account Payable
- Able to preset bank account to make transfer of payment
- Easy to search for Supplier By Name , By Product and more
- Easy to search purchase history or last price
- Trace back Purchase Order, Purchase Requisition was come from each production order, sale order and any source
- Easy to direct make Purchase Order with out Requisition
- Use PA to make decision compare price for high price item
- Able to Order material of product without exist code in database
- Support consign purchase order
- Support Multi level of discount
- able to show picture on PO PR correct more detail of requisition
- Realtime input to seek Purchase history on Grid by press F9 key
- Able to separate due date request date by item and able for partial delivery
- Highlight status of Purchase Order and Requisition
- Report Purchase Order and Requisition Status
- Summary Report of Purchase Order able to filter by Supplier
- Compare and Analysis for price of Purchase make it to plan for use in next year
- Report Top of purchase with vender promotion
- Analysis of Purchase Report, Vender Analysis , Delivery Quality of item and more
